# BAMMIDI GOVINDA RAO

+91 9553989501 | bammidigovindarao1729@gmail.com | LinkedIn | GitHub | Portfolio

## Education

**B.Tech in Artificial Intelligence and Machine Learning** 2021 – 2025

*Sri Venkateswara College of Engineering and Technology, Srikakulam (JNTUGV)* *CGPA: 8.17/10 | First Class*

- **JNTUGV Gold Medalist – AIML:** highest academic performance in the AIML branch across all JNTUGV-affiliated colleges (2021–2025 batch), awarded at the university's first convocation, July 2026.

## Experience

**Full Stack Developer (Founding Team)** Sept 2024 – Present

*maahita technologies* *Remote*

- Joined at the early product stage and owned a large part of the core implementation of the company's **multi-tenant school ERP**, across product requirements, React/TypeScript frontend, Node.js/Express APIs, PostgreSQL, testing and deployment.
- Helped migrate the platform from single-tenant Firebase to **schema-per-tenant PostgreSQL** behind an Adapter/Repository data layer, isolating each school's data in its own schema.
- Implemented core business logic across **15+ ERP modules** (admissions, timetable, marks, fees, subscriptions), from requirement to release.
- Built authentication and **role-based access control** across four roles, and a **Razorpay** webhook-driven subscription lifecycle (trial, grace period, upgrade).
- Visited schools to **demo the product**, gather requirements and join negotiations and follow-ups, helping onboard **two pilot schools**; turned their feedback into product changes.
- Tested and debugged the product end to end (**Vitest** unit tests, **Playwright** E2E suite) and fixed production issues while pilot schools were using it.
- Deployed with **Docker and Nginx on DigitalOcean** via GitHub Actions and owned production releases.

## Projects

**maahita School ERP** | *React, TypeScript, Node.js/Express, PostgreSQL, Docker* 2024 – Present

- **Problem:** multiple schools needed to share one platform while keeping their data isolated. **Built:** a schema-per-tenant PostgreSQL architecture with the tenant search path set per connection, **240+ versioned migrations** with paired rollbacks, and a CI schema-drift check.
- Built the REST API layer behind **15+ ERP modules**, covered by Vitest unit and Playwright E2E tests, including Razorpay billing, PDF receipts and WhatsApp broadcasts.

**Vinodam – Live Quiz Platform** | *React, Firebase, real-time sync* 2026

- **Problem:** a school principal needed a TV-quiz-show style platform for a student event, within a few weeks.
- **Built:** an admin console, projector view and student phone screen synced in real time (rounds, timers, scoring, live leaderboards, join by event code). Built v1 solo; the team adopted and hardened it into a named maahita product.
- **Result:** ran live with about **300 students**; scores and leaderboards updated for hours without a failure.

## Technical Skills

**Languages:** JavaScript, TypeScript, SQL, Python, HTML, CSS
**Frontend:** React, React Router, Vite, Tailwind CSS | **Backend:** Node.js, Express.js, REST APIs, JWT
**Database:** PostgreSQL (JSONB, migrations), Firebase | **Auth/Payments:** Firebase Auth, Razorpay
**DevOps/Testing:** Docker, Nginx, GitHub Actions, DigitalOcean, Git, Vitest, Playwright
**Practices:** Design patterns (Adapter, Factory, Repository), layered architecture, spec-first design, Agile (Jira)
**AI/ML:** ML fundamentals, LLM fundamentals, RAG concepts, tokenization

## Achievements

**Writing & Community:** 12,000+ LinkedIn followers; engineering journal at govind-dev-eta.vercel.app.
