SUMMARY

Full-stack developer with 1.5+ years of experience building multi-tenant SaaS applications using React, Next.js, Node.js, PostgreSQL, and Firebase. Delivered production features for school ERP platforms and enterprise maintenance systems from development through deployment.

SKILLS

Languages: JavaScript, TypeScript, Python, C++, HTML, CSS

Frameworks/Libraries: React, Next.js, React Native, Node.js, Express.js, Tailwind CSS

Databases/Cloud/Tools: PostgreSQL, MongoDB, Firebase, Prisma ORM, REST APIs, JWT, Git, GitHub, Jira, Vercel

EXPERIENCE

Full Stack Developer

Jan 2025 – Present

māhita technologies

Remote

- Ship features end-to-end on a multi-tenant school ERP SaaS for Indian schools – React/Next.js frontend, Node.js backend, PostgreSQL/Firebase data layer – across 8 modules (Student Management, Academic Year, Promotions, Attendance, Curriculum, Timetable, Fees, Reporting).
- Implemented feature gating, subscription-driven UX, JWT authentication, and role-based access (multi-tenancy) so each school sees only its own data.
- Revamped the official company website, improving performance scores by 40%; integrated WebRTC for real-time communication features.
- Own git workflows, deployments, and release process; debug live production issues during active school usage, mentored through PR reviews by engineers with 10–14 years of experience.

PROJECTS

māhita School ERP | *React, Node.js, PostgreSQL, Firebase*

2025 – Present

- Multi-tenant SaaS ERP for Indian local schools – students, attendance, fees and receipts, subscriptions; I build and ship across every layer, from database design to releases and production support.
- Built production features across the entire stack, from database design and APIs to frontend implementation, deployments, and live support.
- Implemented subscription workflows, role-based access control, and scalable server-side data management.

Metro QMS – QR-Based Maintenance System | *Next.js, TypeScript, Prisma, PostgreSQL*

2026

- Built a QR-based maintenance platform for a metro rolling-stock manufacturer, enabling instant access to equipment history, fault logs, schematics, and maintenance records.
- Implemented role-based access control, approval workflows, audit trails, analytics dashboards, and QR-based asset tracking.

Vinodam – Live Quiz Platform | *React, Firebase, real-time sync*

2026

- Real-time quiz platform for school events with three synchronized screens (admin control, projector display, participant phones); prototyped solo in weeks, adopted as an official māhita product, and ran its first live event with 300 students flawlessly.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning

2021 – 2025

Sri Venkateswara College of Engineering and Technology, Srikakulam

Grade: 8.0/10 | Gold Medalist

ACHIEVEMENTS

Academic Excellence: Awarded the **Gold Medal** for the 2025 B.Tech graduating batch.

Production Impact: Built and shipped features used daily by real schools; ran Vinodam's first live event with 300 students with zero downtime.

LinkedIn Influence: Built a community of 12,000+ followers by sharing technical tutorials and career content.
